

Recover Passwords of VBA Projects with Atomic VBA Password Recovery

It happens to us all; forgetting a password for a crucial file, only to find that there seems to be no way around the problem and that the data will be inaccessible for good. However, all hope is not lost, and there are powerful utilities out there which are designed to recover your passwords and give you the best chance possible at achieving this. If you have forgotten your password for any Microsoft Office password protected file which contains a password protected VBA code, one of the solutions you can try is called Atomic VBA Password Recovery.

Atomic VBA Password Recovery provides you with the highest chance possible of recovering your password for a VBA project. This solution is easy to use, requiring no special knowledge and not bombarding you with complex settings or confusing configurations and controls. All you need to do is run the software and select the file you need to recover access to and it will display the original VBA password (<http://www.apasscracker.com/products/vba-password.php>) in seconds.

The process of recovering your passwords takes just three clicks and a few seconds afterwards, you should have your access to the file restored. If you are not yet convinced, you can even take a look at a working example from the product website at <http://www.apasscracker.com/products/vba-password.php>. The software works in real time, and to get started with it, all you need to do is run the wizard and it will guide you through each step. This solution could not be easier to use; providing you with almost immediate results.

Unlocking different types of documents is a little more complex, but your VBA passwords may fit to unlock these documents as well, as according to statistics. Compared to buying other password recovery tools, one for each type of software, it can save you many hours of time and a great deal of money too. With Atomic VBA Password Recovery you can also enjoy a broad range of compatibility. The software allows you to unlock any password protected VBA projects that have been created with any version of Microsoft Office from Office 95 up to Office 2003.

With Atomic VBA Password Recovery, you can enjoy guaranteed performance as your lost VBA password from any Microsoft Office 95 to 2003 document will be displayed as soon as you run the wizard, with results just being a click away. It also doesn't matter how long or complex your VBA password is, even if it contains rare multilingual characters or other symbols. The moment you open your inaccessible document in the software, your password will be displayed.

You can find more information about this VBA password recovery solution (<http://www.apasscracker.com/products/vba-password.php>) at the company's website. Here you can also download the trial version or view an online demonstration. The complete version of the software costs a very modest \$30 while a business license costs only \$40. It supports all versions of Windows and all editions of Microsoft Office from 95 up to 2003. At the site, you can also find any support information that you may need.
