

MIE Kiosk Data Collection and Scheduling Software Released - Business::Other Software

MIE Solutions, a proven leader in the software industry, has created revolutionary shop floor data collection software called MIE Kiosk. MIE Kiosk Software offers paperless touch screen data collection which makes use of production scheduling to enable a paperless environment. MIE Kiosk data collection and scheduling software makes using barcode technology to capture employee work through a manufacturing job shop a relic of the past. MIE Trak Kiosk has an easy to use interface with large buttons which enable employee's to clock in/out for the day, in/out of jobs and issue bill of material to jobs for job costing. MIE Kiosk Data Collection and Scheduling Software is unique because it integrates with scheduling software which enables the capability to highlight all the jobs an employee is scheduled to work on. Dragging and dropping jobs onto the scheduling whiteboard will immediately change the jobs employee's see as the clock into their machine and associated job. Eliminating keystrokes is a key to managing data collection and that is precisely what MIE Kiosk does as recently viewed items are shown in plain site on the computer screen. To actually go paperless MIE Kiosk enables employee's to display drawings, blueprints and models on the computer screen eliminating extra paper flowing through a lean shop. MIE Solutions provides an integrated environment to all its products including document management with MIE Docs and integration into MIE Exchange B2B supply chain software application. Customers can now enter purchase orders online through MIE Exchange and those purchase orders a securely transmitted directly into the MIE Trak production control and tracking system to eliminate data entry errors. Many businesses still do not use data collection tools which are available to help in improving the business to improve efficiency. So, MIE Solutions has released a free trial version of MIE Kiosk Data Collection and Scheduling Software which can be downloaded and tested. MIE Solutions is the leading provider of production control software for the entire manufacturing sector. Incorporating MRP, ERP, Scheduling Shop floor data capture (SFDC) with bar coding and costing capabilities. MIETrak (formerly known as FabriTrak) is the market leading software for sheet metal fabricators, precision engineers and manufacturers. Our services also include training, full product support and on-site implementation. The mission of MIE Solutions is to apply advanced technology to improve manufacturing productivity and quality in the field of fabrication. At MIE Solutions, we do not compromise product quality or service. We strive to satisfy our customer's every reasonable requirement with speed, courtesy and honesty. Our goal is to be known throughout the world for the development and production of innovative products. We endeavor to be regarded as the leading supplier of high technology in the fabrication industry.
