

## HP Portfolio - Designjet Plotters

Ever since its debut, the HP Designjet plotter is in great demand in the IT world. The [HP Designjet plotters](#) enable the printing of high quality documents in large scale. It offers a premium performance and can be used by workgroups of engineers, retailers, architects, office users and print service providers. With this state-of-art plotter, anyone will be able to meet the requirements of the professional publishing environment. The great part is that the product is becoming more and more sophisticated as the year goes on. Now, it has improved quality and print speed to meet the demands of the modern user.

HP Designjet plotters offer a quantity and quality of features that provide a cost-effective solution and convenient option to any organization. It helps to meet the businesses need of accomplishing large printing jobs. With the HP Designjet plotters, you will get what you have paid for.

A wide range of HP Designjet plotters can be found on the market. Therefore, it is best to understand your business needs before you move ahead and shop for the plotters. Like for architectural or engineering firm, the printing is going to be large but color consistency as well as accuracy is not what you are probably looking for. However, if your business deals with graphics then, color accuracy and consistency, smooth transitions, high resolution and other printing technologies should be your concern.

The main HP Designjets categories includes - [Designjet T1100](#), Designjet T610, Designjet Z2100 and Designjet Z6100. From the wide range of available, choose HP Designjet plotters that meet your requirements and fit into your budget perfectly.

You might also consider the HP refurbished Designjet plotters. These [refurbished Designjet](#) Plotters enable high quality professional output at a fast speed. However, it is best to purchase these refurbished plotters from some authorized resellers only, so that you can rest assured of having received reliable, optimal performance and quality products.

You can also get HP Designjet Ink & Printheads too along with the plotter. These are specially designed to deliver high performance with the HP Designjet plotters. Purchase the original cartridge to stay ensured of getting pure HP in order to get best results. Those other cheap refills available in the market are not going to give the kind of result the original gives. Get a better quality and produce more with the original HP Designjet Ink & Printheads. The choice is yours, whether to choose original cartridge or go with cheap refills.
